Objective:-

• To teach people to understand their own thoughts and emotions, through the art of Therapy.

Resource Person:

• Dr. Shambhavi Samir Alve (Psychotherapist practicing Co-founder of Empty Mindscape LLP, Mumbai, Vice President of Women's Indian Chamber of Commerce & Industry's (WICCI), National Mental Health Council)

A Workshop on the topic "Cognitive Behavioral Therapy" was organized by the Department of Psychology. Dr. Shambhavi Samir Alve was the resource person. It was held on 28th December 2021 at 2:30pm at Zoom Platform. CBT ultimately aims to teach patients to be their own therapist, by helping them to understand their current ways of thinking and behaving and by equipping them with the tools to change their maladaptive cognitive and behavioral patterns. The aim of the workshop was to promote of self-awareness and emotional intelligence by teaching participants to "read" their emotions and distinguish healthy from unhealthy feelings and also to develop self-control by teaching specific techniques to identify and challenge distorted thinking.

The workshop started with welcome note by Asst. Prof. Riya Thakur. She outlined the objectives of the webinar. Apart from a good number of students, the programme was attended by faculty/research scholars/experts from different universities and colleges of India.

The program formally began with the welcome address delivered by worthy college Principal Dr.R.K. Tuli. Resource Person Dr. Shambhavi Samir Alve started the session by explaining about the CBT. She explained that it is important to learn how thoughts, feelings, and situations can contribute to maladaptive behaviors. The process can be difficult, especially for people who struggle with introspection, but it can ultimately lead to self-discovery and insights that are an essential part of the treatment process.

Goal setting can be an important step in recovery from mental illness and helping you to make changes to improve your health and life. During CBT, a therapist can help with goal-setting skills by teaching you how to identify your goal, distinguish between short- and long-term goals, set <u>SMART</u> (specific, measurable, attainable, relevant, time-based) goals, and focus on the process as much as the end outcome. Learning problem solving skills can help you to identify and solve problems that arise from life stressors, both big and small, and reduce the negative impact of psychological and physical illness. Problem solving in CBT often involves five steps: Identifying a problem, Generating a list of possible solutions, Evaluating the strengths and weaknesses of each possible solution, choosing a solution to implement and implementing the solution.

Later she asked the participants to write the few things which would put them in stress and which was the greatest blessing received by you and at last revealed that we have more blessings and also made to feel everyone how much blessed they are compared to many others. Also she gave few ideas about few relaxation techniques such as Meditation, Breathing exercise, Walking, Eye relaxation, Music, Exercise and Yoga and Journaling. She ended the session with psychometric test on Social Inhibition and Negative affirmation in which participants answered the test and analyzed their result.

Finally, she ended the session with a final quote saying: *"To live in the moment and give your full attention to what is in front of us and the rest of our life will take care of itself."*
